

CYCLE OF PERSONAL OWNERSHIP

JANUARY 2022 WINNER

CHELAN COUNTY

BILL SWEENEY

Bill recently completed a complex project at Rock Island PH2 that involved replacing three circuit breakers, four motor operated disconnects, eight potential transformers and six disconnect switches all at 115 kV. Bill meticulously planned the work in stages to best accommodate plant operations and to minimize impact on generation. To accomplish this, Bill developed sequencing plans with specific call-outs in the design drawings to alert technicians and wiremen as to how the work needed to be performed. Bill received numerous accolades and appreciation from crew members and foreman as to how great it is working with him and what a great engineer and project leader he is. Bill is a selfless team player and exemplifies the cycle of personal ownership.
